25X1

1. The following designation was assigned 27 October 1958.

(BC-10 ... Battery Charger) This battery charger is designed to charge nickel-cadmium cells and is composed of the following four charging sections:

One section, 38.75 volts maximum at 10 amps.  
Two sections, 10.81 volts maximum at 10 amps.  
One section, 9.3 volts maximum at 35 amps.

Each section will be regulated to maintain a constant voltage float charge of 1.4 volts. In addition, each section will contain a DC voltmeter to indicate the constant level. A provision is incorporated to use each section independently for either charging or floating operation. Approximate size of this unit is 22" x 17-1/8" x 47-5/16".

2. This designation was made on a tentative basis pending approval of this memorandum.
